

El compromiso de la ciudadanía ante el cambio climático

Stephan Brandligt

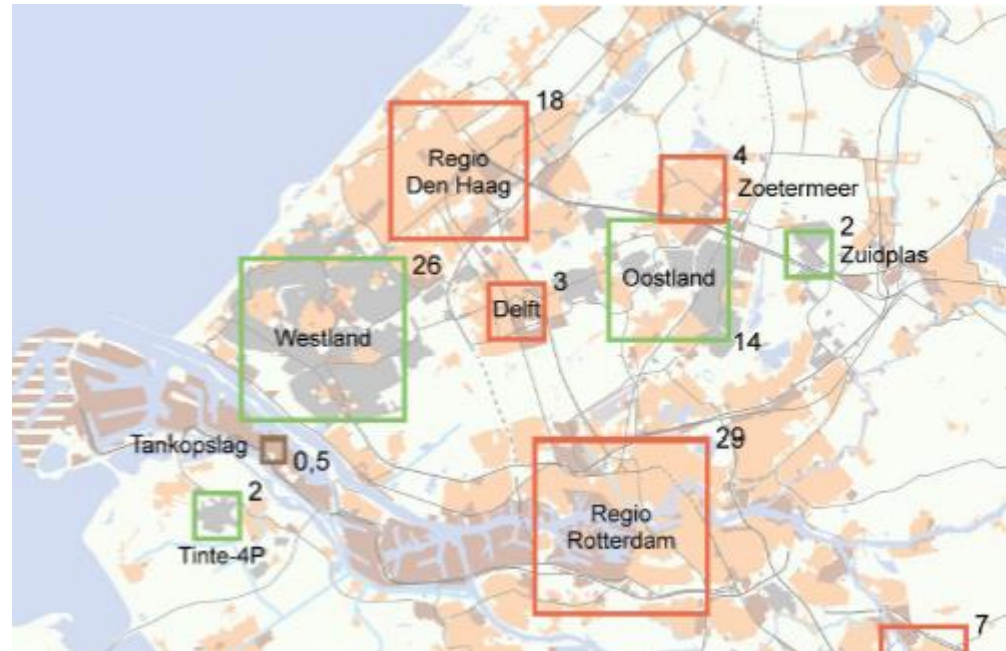

Towards a energy neutral Delft in 2050

Delft

100.000 inhabitants located between Rotterdam –The Hague

Energiemix Delft

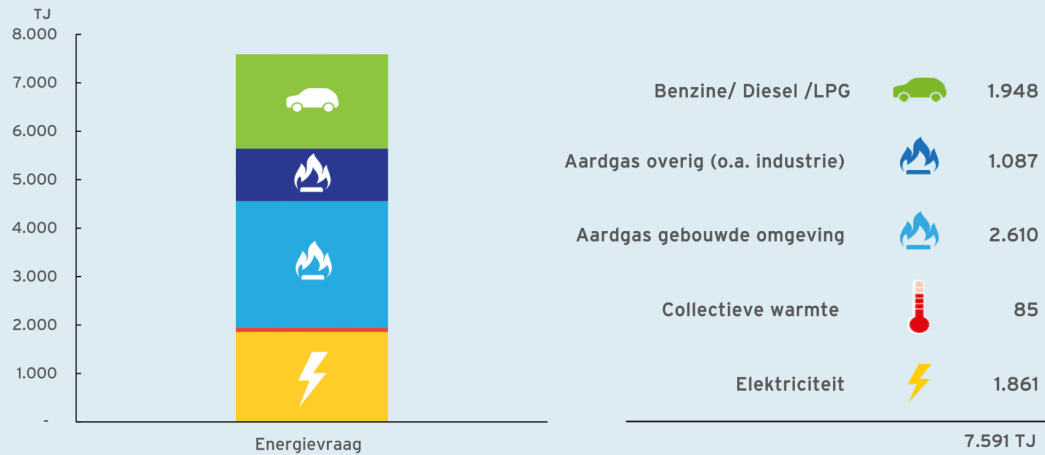

Inwoners: 102.274
 Woningen: 49.199
 Groei woningen 15.000

**OVER
MORGEN**

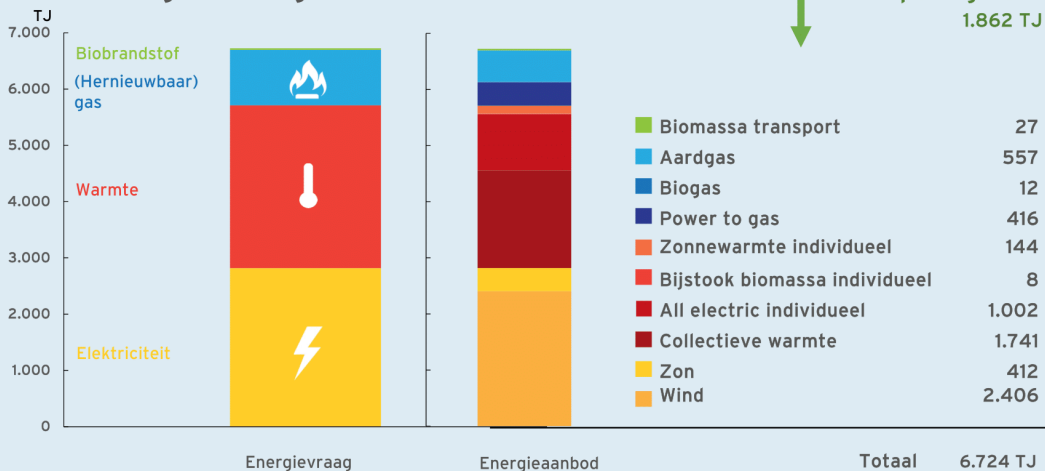

Energiebruik gebouwde omgeving: 52%

23-10-2017

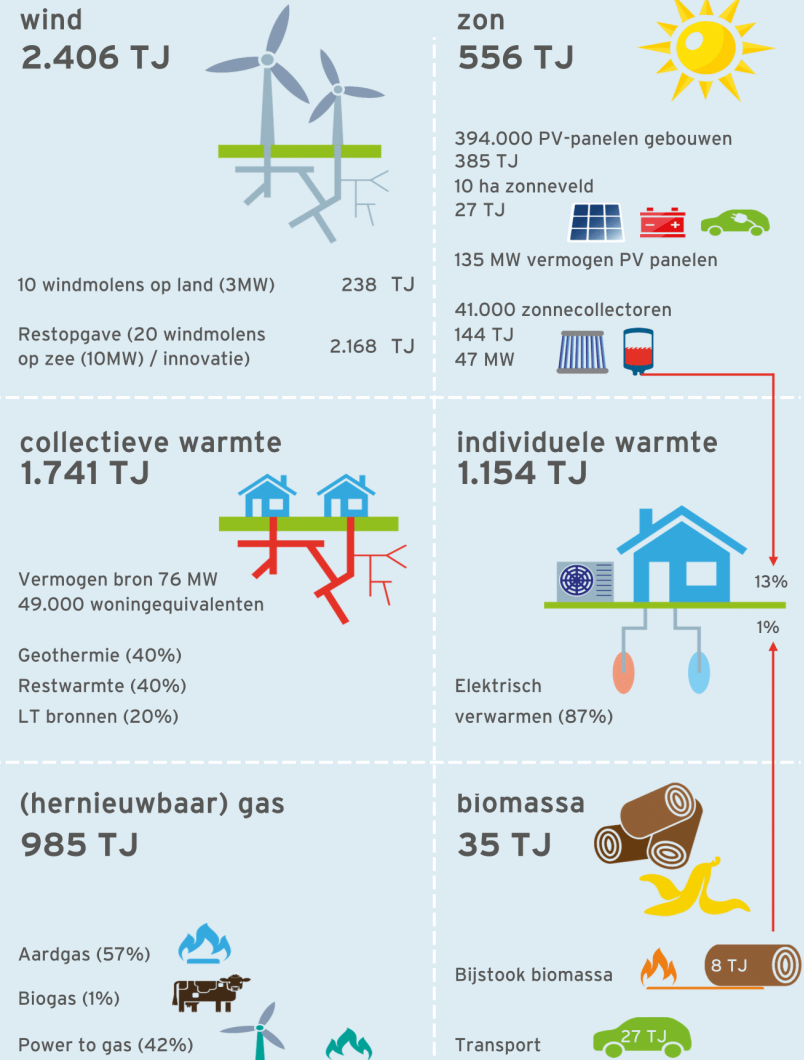

1. Huidige situatie (2015)

2. Energievraag en -aanbod 2050

3. Energieaanbod 2050

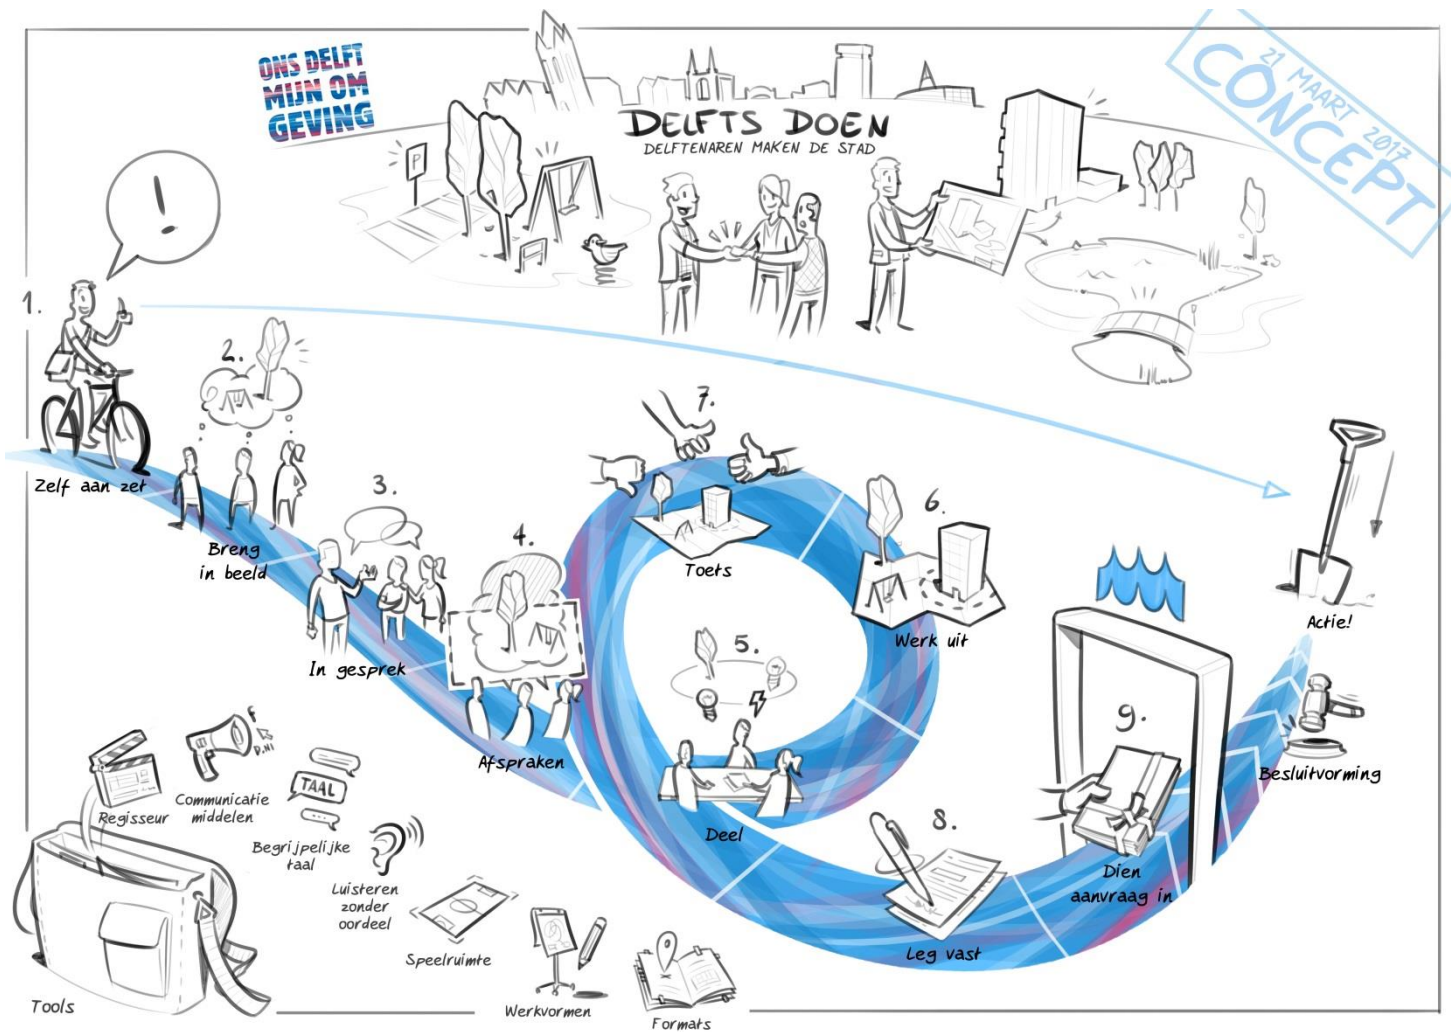

Delft experience

- Link to challenges in the city:
- Energy Transition is an integral part of developments in the city
- Part of neighborhood / neighborhood related task
- Discuss how the city wants to develop and ask the question:
 - What are important issues according to citizens?
 - How to involve the citizens?
- Answer: The Delft Participation Approach

Delft Participation Approach

- We asked citizens: do you want to be involved and how?
- 80% wants to be involved in decisions about neighborhood
- Agree that City takes final decision IF transparent weighing of interests
- Make the framework clear: what can be influenced and what not

Gracias
